Harry Cloud - Artist To Check Out

Harry Cloud is an Experimental Sludge/Doom/Stoner Metal Artist from Midland, GA, USA

What can I say about Harry Cloud. Well he is one weird truly talented individual. I originally featured him back in 2012 when he was known as [Single Mothers](#).

Since then Harry has released a wide range of different releases to impress you with or even frustrate you with as well. As Harry doesn't play to normal genre conventions. His mixture of Sludge, Doom, Stoner Metal and Shoegaze Rock can be frustrating at times. But for every weird and frustrating note Harry does pull a brilliant riff from the Metal Gods that comes out of nowhere to prove he is one hell of a musician.

My personal fave releases are his new album - [Red Barn](#) and [Indian Pussy](#). Indian Pussy is the first album that first introduced me to Harry's weird and wonderful world.

All of Harry's albums are available for Free Download/Buy Now Download on BandCamp. Some people are going to love him and some not so much. But you can't deny that this guy has style and I applaud him for doing something different and something that he truly loves.

Don't expect the best production on some of the releases as Harry does everything himself. So expect some fucked up moods and melodies if you're going to listen to Harry's work.

Harry - Keep up the excellent work my friend. The world needs crazy individuals like yourself to shake things up a bit!!!
