Harry Cloud's latest album, *The Cyst*, is an ambitious and captivating work of art that showcases his unique blend of indie rock and psychedelic rock. The album is a masterful display of Cloud's songwriting abilities, as well as his skill in crafting intricate and dynamic soundscapes. The opening track, "Send Me Pictures," introduces the tone for the rest of the album with its hypnotic guitar riffs and raw vocals. The song builds slowly, layering synth textures and percussion until it reaches a climactic crescendo. This sets the stage for the rest of the album, which is full of surprises and unexpected turns.

One of the standout tracks on the album is "Post Partum," which features Rayna Kilroy. The track has a driving bassline and pulsing drums that create a sense of somber and tension. Cloud's vocals are raw and emotive, conveying a sense of desperation and longing that is palpable. The song also features a haunting guitar solo that adds to the overall atmosphere of the track.

Another standout track is "Squid Friend," which begins with a beautiful melody that gradually builds into a swirling, psychedelic sound collage. The song features layers of distorted guitars and soaring vocals that create a sense of otherworldly beauty. The lyrics are poetic and introspective, touching on themes of isolation and self-discovery.

The album's production is another standout feature. Cloud has a keen ear for texture and detail, and each song is crafted with care and precision. The album's mix is spacious and dynamic, allowing each instrument and sound to breathe and occupy its own space within the sonic landscape.

Overall, *The Cyst* is a stunning achievement that showcases Cloud's growth as an artist. The album is full of surprises and moments of beauty, and each song feels like a journey into a different world. Cloud's songwriting is top-notch, and his ability to create intricate and dynamic soundscapes is truly impressive. *The Cyst* is a must-listen for fans of indie rock and psychedelic rock, and it solidifies Cloud's place as one of the most exciting and innovative artists working today.
